SUMMARY

Full Stack Software Developer with commercial experience in front-end development and hands-on experience building backend applications using ASP.NET Core, C#, Entity Framework Core and PostgreSQL. Passionate about designing secure REST APIs, implementing authentication and authorization, writing automated tests and building maintainable applications following modern software engineering practices. Experienced with Angular, Docker, CI/CD pipelines and relational databases. Continuously expanding backend expertise through personal projects focused on production-ready architecture and high code quality.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Backend: ASP.NET Core, Entity Framework Core, LINQ, JWT Authentication, PostgreSQL

Frontend: Angular, RxJS, HTML, CSS, Tailwind CSS

Testing: xUnit, Unit & Integration Testing, Testcontainers

DevOps & Tools: Docker, Docker Compose, Git, GitHub Actions, CI/CD

EXPERIENCE

Junior Front-end Developer

Jun 2025 – Present *ONE House*

Warsaw, Poland

- Develop production web applications and e-commerce platforms using PHP, JavaScript, Tailwind CSS, AlpineJS and Wordpress/WooCommerce.
- Build reusable UI components, optimize application performance and resolve production issues for commercial clients.
- Collaborate closely with designers, SEO specialists and project managers to deliver production-ready software solutions.
- Maintain existing client systems and continuously improve usability, responsiveness and code quality.
- Work in a Git-based collaborative development environment following modern software delivery practices.

PROJECTS

BookFlix – Full Stack Book Management Platform

ASP.NET Core, Angular, PostgreSQL, Docker

- Designed and developed a complete full-stack application for managing personal book collections using ASP.NET Core Minimal APIs and Angular.
- Implemented secure authentication and authorization based on JWT access tokens together with refresh token rotation stored in HttpOnly cookies.
- Built a complete REST API following feature-based architecture with dedicated modules for authentication and book management.
- Implemented ownership-based authorization ensuring users can access and modify only their own resources.
- Developed custom validation layer for authentication and domain models together with comprehensive unit tests using xUnit.
- Implemented integration tests using WebApplicationFactory, Testcontainers and PostgreSQL to validate complete HTTP request pipelines and database interactions.
- Designed relational database schema using Entity Framework Core and applied it with PostgreSQL
- Containerized the entire application with Docker and Docker Compose for reproducible development and testing environments.
- Configured GitHub Actions CI pipeline to automatically build the solution and execute automated tests.
- Applied modern ASP.NET Core concepts including Dependency Injection, configuration-based services, middleware, Minimal APIs and clean separation of application features.

EDUCATION

University of Warsaw
Warsaw, Poland

Oct 2024 – Present *Master's Degree in Big Data Management*

- Academic projects involving Python, R and data analysis.

University of Economics in Katowice
Katowice, Poland

Oct 2021 – Jul 2024 *Bachelor's Degree in Computer Science*

- Specialization in Mobile Applications and Game Development.
- Completed academic full-stack projects using Django, Angular and PostgreSQL.
